Name of commodity ※ Hand press machine ※ Three kinds of variations

Theme Small machine that can contribute to trial process that has generality

Desk-top machine that can demonstrate power that can correspond to simple, various processes
※ For treatment device(JIG) installation position ※

Wide set space height direction
The work space can be secured.
Enough amount of the pressurizing stroke is a specification.
The price of the main body is set at a low price.
◆ It is possible to take an active part to the generality trial process. ◆

The production process to a more ept production circumstance by installing our production treatment device/tools in the hand press machine.

Product introduction

Photo

total height	550mm
Width	280mm
Depth	280mm
Maximum treatment device work area	190mm × 320mm
Z axis stroke	0 ~ 100mm
Weight of machine	10kg
Welding force	about 100kg

total height	670mm
Width	280mm
Depth	480mm
Maximum treatment device work area	190mm × 320mm
Z axis stroke	0 ~ 120mm
Weight of machine	18kg
Welding force	about 180kg

total height	550mm
Maximum treatment device work area	330mm × 450mm
Z axis stroke	0 ~ 100mm
Weight of machine The heater and the thermostat are installed	13kg
Welding force	about 100kg

* The heating temperature corresponds by the specification.
* The heater and the thermostat are installed in the hand press machine. It is possible to correspond also to plastic & metal and the press-fitting process.

Uses

① To the hand press machine Heater & thermostat installation
The press-fitting process of metal fittings by heat can be done to the plastics product.
* Hand press machine *

② The processing that steel and light metals (aluminum, brass, and copper), etc. bend is possible by the installation of the attachment on the hand press machine.
It is the best for making for trial purposes and the process for forming of various products.
* Hand press machine *

③ Cutting such as steel and light metals (aluminum, brass, and copper) can be processed by installing the attachment in the hand press machine.
It is the best for making for trial purposes and the process for forming of various products.
* Hand press machine *

Each size and the heating temperature etc. of the hand press machine can be changed.
The thickness and the size to be able to do bent processing and cutting change by the material.

* Please feel free to consult. *

Low-priced setting

* Development process • Various situations • Parts production • It is possible to correspond. • Trial site *
